- ✦ Making API calls from Server Side

### Technical skills

- ✦ Salesforce Admin
- ✦ Salesforce Apex
- ✦ Lightning Web Component
- ✦ Integration
- ✦ CPQ
- ✦ C, C++
- ✦ SQL, SOQL
- ✦ Core JAVA
- ✦ HTML, CSS

## Project summary

### Project Name: Chat GPT Integration

**Description:** Chat GPT Integration project involves seamlessly incorporating the ChatGPT model into a Lightning Web Components project. The objective is to create an interactive and dynamic chat application within the salesforce ecosystem, enabling users to engage in natural language conversation powered by ChatGPT.

### Project Name: Weather Forecast

**Description:** The Weather Forecast with Client-Server API Integration is a user-friendly weather application that provides real-time weather information based on the user's location or chosen city. The project consists of two main parts: the client-side app and the server-side API, working together seamlessly to deliver accurate weather data. This App with Client-Server API Integration is a valuable tool, empowering users to stay informed about weather conditions, plan their activities, and make informed decisions based on current weather data.

### Project Name: Wellness Calculator

**Description:** The Wellness Calculator project is a software application that determines a person's BMI based on weight and height. The project entails developing an interface that allows users to enter their weight and height, and the application calculates and shows their BMI number. This allows consumers and healthcare professionals to assess their weight status and make informed decisions regarding their health.

### Project Name: Hotel Management Application

**Description:** This is a hotel reservations management application. This program allows hotel management staff to create new room and customer records. The reservation object keeps track of all the customer's reservations at the hotel. It sends an email when a new reservation is made and when a reservation is extended. Chatter Post is performed when a new reservation is created that is only visible to the Manager. When you create a Reservation record, it automatically creates a customer record.

### Project Name: Smart Alarm Calculator

**Description:** The software enables users to create, stop, snooze, and activate alarms with ringtones and animations. You can change the ringtone and animation logic to meet your individual needs and the capabilities of the libraries or technologies you choose.
