Professional summary

- Hands on experience in **Objects Models**.
- Experience on creating **Formula Fields, validation Rules, Flows based on requiremen**t.
- Creation of **Users, Profiles, Permission Sets** and applying **securities** at all levels.
- Experience on developing **Apex classes, Apex Trigger including Asynchronous apex**.
- Have a good knowledge of **SOQL**.
- Have a hands-on experience on development of **LWC Component.**
- Having experience working on **LWR** sites.
- Hands on experience in **Rest API Integration.**
- Knowledge to create interactive pages using HTML, JavaScript, CSS, Lightning.
- Have a good knowledge of **Basics Java, Oops Concepts, Basics of Salesforce CPQ**

Technical skills

- Salesforce Administration
- Salesforce Apex
- Lightning Web Component
- Integration
- Salesforce CPQ
- Core JAVA
- SQL, SOQL
- C, C++
- HTML, CSS
- JavaScript

Project summary

1. **Project Name**: Portfolio Builder

   Description: The application provides relevant information to potential employers about your skills, experience, and projects you've worked on. Your portfolio builder is like your online resume. Potential clients and hiring managers can easily find you online and check out your previous projects and skills.

   Key Implementation Expertise: -
- Component Creation and Layout Designing
- Styling CSS, SLDS Library
- Data Model (Custom object and fields)
- Use of Wire Adapter and Component communication

2. **Project Name**: Chat GPT Integration

   Description: Chat GPT Integration project involves seamlessly incorporating the ChatGPT model into a Lightning Web Components project. The objective is to create an interactive and dynamic chat application within the salesforce ecosystem, enabling users to engage in natural language conversation powered by ChatGPT.

   Key Implementation Expertise: -

- Integrated Lightning Web Components with external APIs to enable real-time communication with Chat GPT.
- Implemented secure remote site settings to facilitate safe data exchange between Salesforce and external APIs.
- Utilized custom settings to provide flexibility in managing parameters within the application.
- Employed REST API techniques to streamline data exchange between Salesforce and external services

3. **Project Name**: Weather Forecast

   Description: The Weather Forecast with Client-Server API Integration is a user-friendly weather application that provides real-time weather information based on the user's location or chosen city. The project consists of two main parts: the client-side app and the server-side API, working together seamlessly to deliver accurate weather data. This App with Client-Server API Integration is a valuable tool, empowering users to stay informed about weather conditions, plan their activities, and make informed decisions based on current weather data.

   Key Implementation Expertise: -

- Used LWR to develop a responsive web application environment.
- Incorporated real-time weather updates to improve data processing and user engagement.
- Made an API calls from Server side.

4. **Project Name**: Wellness Calculator

   Description: The Wellness Calculator project is a software application that determines a person's BMI based on weight and height. The project entails developing an interface that allows users to enter their weight and height, and the application calculates and shows their BMI number. This allows consumers and healthcare professionals to assess their weight status and make informed decisions regarding their health.

   Key Implementation Expertise: -

- Used styling using CSS and SLDS library.
- Use of Static resources.
- Used LWC directives.

5. **Project Name**: Hotel Management Application

   Description: This is a hotel reservations management application. This program allows hotel management staff to create new room and customer records. The reservation object keeps track of all the customer's reservations at the hotel. It sends an email when a new reservation is made and when a reservation is extended. Chatter Post is performed when a new reservation is created that is only visible to the Manager. When you create a Reservation record, it automatically creates a customer record.

   Key Implementation Expertise: -

- Data Model Design: Schema creation for rooms, customers, and reservations.
- Business Process Automation: Utilization of Salesforce Flow for streamlined processes.
- Lightning Web Components: Development for intuitive user interfaces.

6. **Project Name**: Quick Note

   Description: The Quick Note app is a digital application designed to help users easily capture, organize, and manage their notes in a convenient and efficient manner. Whether for personal use, academic purpose, or professional tasks, the app provides a user-friendly interface.

Key Implementation Expertise: -

- Component Development: Streamlined note-taking processes.
- Visual design Enhancement: Visually appealing interface using SLDS icons and CSS.
- Modal Popup Integration: Enhance functionality for improved user experience.

7. **Project Name**: Smart Alarm Calculator

   Description: The software enables users to create, stop, snooze, and activate alarms with ringtones and animations. You can change the ringtone and animation logic to meet your individual needs and the capabilities of the libraries or technologies you choose.

   Key Implementation Expertise: -

- Developed LWCs with efficient layout design for intuitive user interfaces.
- Built modular components for code reusability and easy integration.
- Alarm Functionality logic in JS.
